Bug Report Classifier - Manual

Jack Honour [3063159]

IMPORTANT

You MUST use git to clone the repository and run the code, otherwise you will not be able to replicate the results. Do NOT download the code as a zip file from GitHub, as this will not include the necessary LFS files which contain the pre-trained models.

```
git lfs install
git clone https://github.com/jaxkdev/ise_coursework
```

Note: cloning will take as long as it takes to download 2.5GB of data, so please be patient.

Please read the `requirements.pdf` file before running anything to ensure you have the necessary hardware and software requirements. As well as a correct virtual environment setup with the required dependencies installed.
